-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's arguments filed on June 28, 2005 have been fully considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Nishi (2001/0010579).

Nishi discloses a method of manufacturing an optical element, a device manufacturing method and a lithographic projection apparatus comprising a radiation system (2); a support structure (18) constructed and arranged to support a patterning device (R), the patterning device constructed and arranged to pattern the projection beam according to a desired pattern; a substrate table (22) to hold a substrate (W); a projection system (PL) constructed and arranged to project the patterned beam onto a target portion of the substrate, wherein at least one component in the apparatus that in use experiences a heat load is made of a low coefficient of expansion material having a coefficient of thermal expansion having a zero-crossing at a temperature between a manufacturing temperature and an operating temperature of that component (para 0096).

Response to Arguments

In response to applicant's arguments rejection based on Davis and Holzer references are withdrawn.

Applicant states in the specification ZERODUR is manufactured by the process of claim 1 and possesses characteristics of the claims 2-19. Nishi teaches using material made of ceramic such as ZERODUR. Therefore, it is inherent that the material used in Nishi is manufactured by the process of claim 1 and possesses all the characteristics claimed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter B. Kim whose telephone number is (571) 272-2120. The examiner can normally be reached on 8:00 AM - 5:30 PM.
